

# Pre K I March Newsletter

March is going to be a great month in our classroom. Some of the themes for this month will include math and science, artists and St. Patrick's Day.

During the first week of March we will be using different snacks to learn about math and science concepts such as sorting, comparing properties and identifying patterns. Later in the month we will learn about various artists and different types of art. We will also discuss and celebrate St. Patrick's Day. We will post a sign-up sheet for our St. Patrick's Day party as the date gets closer.

We want to officially welcome Ms. Jill to our classroom. We feel that she is a great asset to the Busy Bees and hope you all feel the same.

Parents, please be sure your child has at least one complete change of clothes in their cubby that is labeled with their name or initials.

As always, please come to us with any ideas, comments or concerns you may have.

Thank you,  
Busy Bee Teachers
